

# VFF Pension - our current numbers

## About VFF Pension

VFF Pension is an occupational pension association for employees within the Volvo Group and Volvo Cars as well as certain companies that were previously part of one of the groups or are related companies.

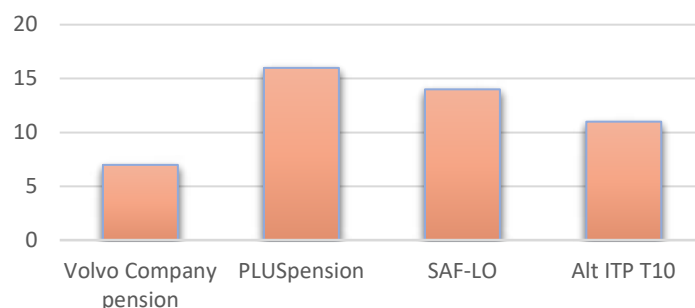

VFF Pension is a mutual occupational pension association owned by its members i.e. those who have an insurance with us. Mutuality means that there is no profit interest, the surplus goes to the members in the form of a bonus.

Our mission is to manage your additional pension - Volvo Company pension - with high customer satisfaction. Our insurances are managed with traditional management, this means that we at VFF Pension manage the capital and that you, as the insured, are guaranteed a certain amount when you start withdrawing your pension.
